JUSTINE YOUNG

I am a UX designer interested in joining a collaborative design team that is working on creating innovative solutions in software and technology.

Having worked with a startup on an AR mobile app, I would love to design comprehensive user experiences with a wider reach and bigger impact.

Jira

EXPERIENCE

The Portal
UI/UX Designer | August, 2018 - Present

- Work closely with client as sole UI/UX Designer
- Translate wireframes utilizing UX best practices and user feedback in collaboration with the business requirements of client company
- Redesign digital marketing landing page and maintain Wordpress website by implementing UI designs that follow company's style guide

Business Operations Manager | February, 2018 - Present

- Supervise interns by handling correspondence between web development, digital marketing, and sales teams
- Consult digital marketing leads by designing project proposals to present during sales meetings
- Lead group of ~10 interns to host investor/startup events of 200+ attendees
- Create and update documentation of our hosted events and operations after iterating and improving each process

PROJECTS

HoardBoard | Cloud storage prototype [View Case Study]
A concept design for fans to collaborate, upload, and organize images.
User Research, Wireframing, Testing, Branding, and Visual Design using paper, Figma, and UsabilityHub.

AR Medical Application | Mobile UI (NDA blocked)
Worked with stakeholder by translating user flows to low-fidelity wireframes.
Delivered high-fidelity prototype and assets to client and developers.
UI for Wireframe, Visual Design, and Prototype in Sketch.

The Portal - Digital Marketing | Landing Page [View Here]
Designed and implemented a lead generation page with the digital marketing team using Wordpress. I also redesigned the page utilizing UX design best practices to improve the flow and visual design for the page.
